Proceeding Abstract **"Gender and Development in Changing Society"**

PREFACE **Rector of Hasanuddin University**

International Conference on Gender and Development (ICGD) 2018 was held on the campus of Hasanuddin University in Makassar during 10-11 July 2018. In this activity, 91 abstracts of scientific papers will be presented so that it has many useful discussions and exchanges that contribute to the success of the conference.

The 91 abstracts that were presented on the first two days formed the heart of the conference and provided ample opportunity for discussion. This change, allowing the conference to end with invited talks, was a departure from the format used at previous ICGD gatherings in which the conferences ended with a poster session. The abstracts were split almost equally between the ten sub themes. Of the abstracts presented, 91 of which are included in the volume of this process, P3KG Hasanuddin University for the first time publishes an abstract and collaborates with SIGn publishers.

In general, there are 2 discussion sessions each of which will be filled by Keynote speakers and invited speakers. Keynote Speakers will be filled by Dr. HC. H.M. Jusuf Kalla (Vice President of the Republic of Indonesia), Yohana Yembise (Minister of Women Empowerment and Child Protection of the Republic of Indonesia), and Prof. Dr. Dwia Aries Tina Pulubuhu, MA (Rector of Hasanuddin University). for invited speakers will be filled by prof. Siti Kusujarti, Ph.D (Warren Wilson College, America), Prof. Dr. Emy Susanti, MA (Airlangga University, Indonesia), Prof. Sharon Bessel (Australian National University, Australia), and Timo Duile Ph.D (Political Science, Philosophy and Cultural Anthropology at Bonn University).

Generous support for the conference was provided by P3KG Hasanuddin University, ASWGI, SIGn Publishing, and many who contribute and participate in the completion of this book. Thus this book is held as a guide for ICGD 2018 activities. Hopefully the holding of this event can provide benefits for the development of science, especially about Gender and Children Studies.

Makassar, 6th July 2018

Prof. Dr. Dwia Aries Tina Pulubuhu, MA.

Proceeding Abstract "Gender and Development In Changing Society"

CONTENTS

Preface: Rector of Hasanuddin University	v
Contents	vii

eklefinapattinama@yahoo.co.id

Abstract—Global climate change is not a natural problem but it happens because of human behavior that does not appreciate earth and does not put the earth as an important part of life, it appears in the behavior of managing the earth in ways that are incorrect even harm the earth. As a result the climate changes, scarcity and decreasing of water quality, drought, floods, landslides, food insecurity, have become issue of biodiversity that is threatened by the ecological crisis. The ecological crisis greatly affects women, because women in daily life are most concerned with the sources of life from the nature. In many rural areas it is related to the gender roles assigned to it.

The objectives of this research are (1) to identify the impacts of climate change for women and children (2) to analyze the spirit of spirituality of eco-feminism as a movement that fosters sustainable human life (male-female) and nature with gender perspective in facing climate change.

The research findings show that (1) the impact of climate change occurs because Earth is seen as the object / tool (to produce) and patriarchal dominance. Leaving both direct and indirect consequences that affect community's needs, values, and way of living. 2). There is still awareness to care for the earth with the spirit of eco-spirituality, concerning the Creation-oriented spirituality for sustainable life. 3). The Movement of Spirituality of Justice, acting and doing fairly on nature, with gender perspective. Movement that fosters sustainable human life (male-female) and nature/earth.

Keywords: *Climate change, ecological crisis, eco-feminist spirituality, gender perspective*
